

MUSTANG!!!

REF. 755006 FORD MUSTANG FR500 GT3 "LONGBEACH"

PRICE: \$53.98

The FORD MUSTANG, an all American icon, is the latest offering from the **NINCO 1** range, coming in a very recognizable livery for real racing sensations. Usual simplified mechanics & design.

REF. 755019 FORD MUSTANG FR500 GT3 "LONGBEACH" N-DIGITAL

PRICE: \$71.98

This new model also comes as a "ready to race" N-Digital version. Thanks to the mechanical set-up and interior design, they are ideal racecars for home-use, N-Digital NINCO track sets.

MUSTANG!!!**REF. 755007 FORD MUSTANG FR500 GT3 "DAYTONA"****PRICE: \$53.98**

For direct, head-to-head, competitive home racing, another FORD MUSTANG hits the track with a spectacular second livery containing the usual **NINCO 1** mechanical set-up, simple and practical for casual enjoyment.

**REF. 755020 FORD MUSTANG FR500 GT3 "DAYTONA" N-DIGITAL****PRICE: \$71.98**

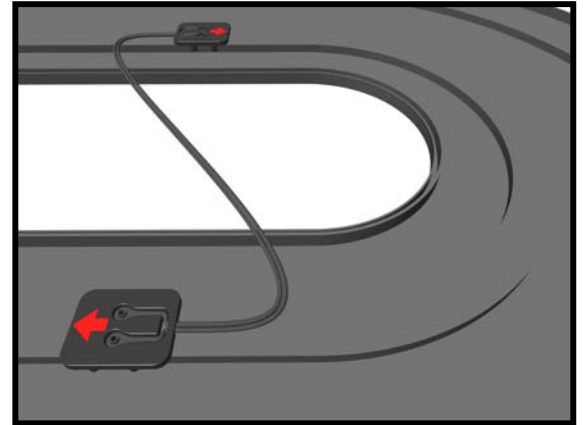

Like its Mustang "Long Beach" stable mate, the beautiful Mustang "Daytona" comes ready to race on the home N-Digital track, with the N-Digital "chip" already installed.

1/28 Scale**XLOT****REF. 760004 FERRARI 430 "SEVEN7" (KIT)**
PRICE: \$159.98

1/28 scale **XLOT** has a second model available now to compete with the XLOT Porsche 997. As announced at the beginning of the year, the FERRARI 430 is the new jewel in the crown. An extremely tunable model thanks to the fully adjustable all metal chassis, allowing it the freedom to run in any kind of competition or racing layout. Presented as a complete kit, the front and rear drive trains, transmission and motor must be installed.

ACCESSORIES**NINCO** *SPORT***REF. 10410 ELECTRONIC CONTROLLER**
PRICE: \$104.98

Electronic controller specifically recommended for racing **NINCO SPORT** category cars. Personalized adjustments include 4 x braking programs and 6 acceleration settings all Inter-compatible.

REF. 10314 2 x POWER TRACK BOOSTER CABLES
PRICE: \$16.98

Given the importance of the level of track maintenance required for large size N-Digital tracks, NINCO has come up with POWER TRACK BOOSTER CABLES to ensure the perfect transmission of all information to ensure the track workability.

With N-Digital, all the data flows through the track, and if there are damaged connections, oxidized rails or simply a lot of dirt, this can affect the tracks capabilities on larger layouts. Cleanliness of the braids and the rails, and constant current flow on all parts of the track are important, and more so on very large layouts. It is recommended that the following maintenance steps be employed:

- 1) Check and clean the cars' braids (change if necessary)
- 2) Check and clean track pieces (change if necessary)
- 3) On large layouts use the 10314 POWER TRACK BOOSTER CABLES.

Installing the cables:

- Connect to track pieces in the same lane.
- Ensure correct polarity and the direction of play as indicated on the terminal

XLOT SPARES:

Ref. 761407

2 x axle Ø 3 x 65mm (F430)
